

Happy Hollow Sidewalk Project

August 12, 2015

PROPOSED TIME LINE: At this time, all of the concrete work is completed. Final grading, seeding, fertilization and mulching will take place any day now. Once the grass starts to grow, it will be important that those areas are not mowed! Please let the grass grow so the roots can get established. We will let you know when it is okay to mow. The City will also be watering these areas for you with our water truck, on a regular basis, until the grass is established enough to survive on its own.

WEATHER DELAYS: Excessive rain and overly saturated soil have been a problem. However, since the ground dries out relatively quickly, on the surface, we will be able to move ahead with seeding.

If you have any questions or concerns, please contact Dan Nixon or Tim Hoskins.

The above photos show the retaining walls that were built following the installation of the new sidewalks.
